Communications Week program pursues varying student responses

By KEVIN ALLAN
Assistant News Editor

Speakers from such organizations as the Scripps newspaper chain, San Jose State University and the International "BYU Communications Week" is

swinging on campus. Activities for the week — which include demonstrations of computerized newspaper production, award-winning motion pictures and commercials, and talks by numerous communications specialists — move into their third day amidst reactions on the part of students.

"I'm just interested because this is my major," Doug a sophomore in broadcasting from Oxnard, Calif., said.

"If he knew about Communications Week, Dickerson is, a graduate from Albuquerque, N.M., said. "No, to these weeks' all the time. I think they do it in the people in the departments. The student body care that much."

"I don't believe in newspapers," said Marie Burnett, a junior in humanities from Boston, Mass. "It's all garbage. They just give you all kinds of lies," she said.

Sherie Allan, a freshman in Journalism from Santa Ana, Calif., disagreed. "I think we're shaped by what we read, so we should know about communications."

The main objective of the week's activities, according to Dr. Rulon Bradley of the communications department, is to "help make people more aware of the impact of communications in their lives." Developments in communications hardware in recent years promise to make "the 1980s a most exciting period," he said.

"Because the hardware is improving so rapidly," he said, "it is a great challenge to the individual to keep up with his own personal development."

"With the challenges that we will be facing in all aspects of our lives," he continued, "there is a need to know everything we possibly can about world affairs." And that, he said, is where communications comes in.

The banquet, scheduled for 7 tonight as part of the week's activities, has been cancelled, according to Rhea Pulsipher, administrative assistant in the department of communications.

Committee investigates parking-stall allocations

By DONNA JEAN DAVIS
Universe Staff Writer

Final approval of the proposal concerning the Harris Fine Arts Center lot is pending review in a vice president's meeting.

The parking proposal submitted to the Traffic Committee said the parking lots north of the Harris Fine Arts Center and east of the Abraham Smoot Building, currently labeled as "special use" lots are not being used for more than one half their capacity.

The proposal also stated these lots are some of the prime parking locations on campus and should be used effectively. It pointed out that one of the promises the Traffic Committee received from BYU Traffic Division was that the lot would be used to maximum efficiency.

On Wednesday at 12:30 p.m., the Harris Fine Arts Center parking lot contained 182 graduate student vehicles. The lot accommodates 220

Baker to speak at Y assembly

Republican Sen. Howard H. Baker, a Tennessee lawyer and former leader of the U.S. Senate, will speak at the BYU assembly Thursday in the Center.

President Jeffrey R. Holland said to students that in each election a representative of the party is given an assembly to the public. The forum, normally Tuesday, was rescheduled to Sen. Baker's schedule in Provo, D.C.

His father, Howard H. Baker, served in the 82nd and 88th Congresses. Following his death, his widow, Mrs. Irene Baker, served the remainder of his unexpired term.

Sen. Baker is married to Joy Dirksen, and they have two children.

McCallie School in Chattanooga in 1943. He also attended Tulane University and the University of the South. Following three years in the U.S. Navy during World War II, he earned the LL.B. degree in 1949 from the University of Tennessee Law College.

He was elected to the U.S. Senate in 1966 and re-elected in 1972 and 1978 after serving in a Knoxville law firm. He is co-chairman of the Senate Select Committee on Presidential Campaign Activities, and a member of the Committee on Environment and Public Works and the Committee on Intelligence.

His father, Howard H. Baker, served in the 82nd and 88th Congresses. Following his death, his widow, Mrs. Irene Baker, served the remainder of his unexpired term.

Sen. Baker is married to Joy Dirksen, and they have two children.

Citizens challenge school board action

By DIANE FAIRBANKS
Universe Staff Writer

Members of Citizens for Better Schools, an Alpine School District community group, claims that the school district has conducted unlawful meetings and kept public information confidential.

In May, the Alpine School Board went into a closed meeting to select a new superintendent. The meeting stayed closed for two months, said Don Norton, BYU professor and public chairman of the citizens group. He said proper minutes were not kept during the meeting and the public was not notified of the time, date and place of the closed meetings or the names of candidates being considered for superintendent.

"We tried to find out how they were making decisions and we could not," Norton said. "The minutes were not made public."

Norton also contends the school board members have been deliberating with each other outside of board meetings, causing a high percentage of unanimity in the board's decisions.

"The public should be involved in the decisions," Norton said. "They were making decisions so that every item discussed received a unanimous vote."

Kent Abel, assistant superintendent of the Alpine School District in charge of minutes of the board meetings, said minutes were kept of all the closed meetings, but since he was being considered as a candidate for the superintendent's position, he was not permitted to the closed sessions. Abel said someone else took the minutes in his place.

"I am in the process of sending Norton minutes on every meeting," Abel said.

The time and place of the closed meetings are included in the minutes but a complete list of the candidates was not made public to protect applicants who were employed in other school districts, Abel said.

Abel denied claims that board members were collaborating on the issues outside official meetings.

"I'm not saying board members don't talk to each other," Abel said. "But they don't discuss decisions before meetings."

"The law requires that minutes include date, time and place of board meetings. The names of board members present or absent and names of other persons present, or reasons why divulging their presence would be an infringement of confidentiality," he said.

confidence are also required by law," Abel said. "It is evident why some would want to have that information kept confidential and the law provides for that."

Norton quoted a letter from Arthur J. Bishop, of the State Office of Education, saying, "When those names (superintendent applicants) are submitted to the board of education they become a public record and are available for public scrutiny."

"If this is the case," Norton said, "then applicants do not have the discretion of requesting that their names not be made public."

Abel said he disagreed with Norton and Bishop, because state law provides for an exception. Referring to Norton's information, he said, "You can get any kind of an answer you want, if you ask the right questions."

Norton questions the legality of the board going into a continuous closed meeting. "From the research I've done on this, I think that boards should meet first in an open meeting each time a need for a closed meeting occurs," he said.

Abel said "The law doesn't spell that out. There would have to be a court case in order to have a clear interpretation of the law."

"It would seem a little ridiculous to meet every time for no other reason than to announce that we were going into a closed meeting. We felt perfectly legal," said Abel.

If the meetings were not in complete accordance with the law, the board's selection of a superintendent could be declared void, Norton said.

"I have no intention of voiding that appointment," Norton said. "Max Welker, the district's new superintendent, is overqualified, if anything."

On July 22, Abel answered a letter from Norton with a copy of the minutes of an open meeting held on May 6 where the closed meeting was called. The names of candidates were not given because "that would infringe upon the confidence necessary to fulfill the original purpose of closing the meeting," Abel said.

Norton wrote back to Abel on July 24 stating that the names of people being considered for the position of superintendent must be made public and asked him to explain why they could not be made public.

In a July 30 letter Abel responded to Norton's July 24 letter. "It was felt by the board that in the case of the superintendents interviewed, their names would be held confidential upon request because of their employment in other school districts."

Court releases copies

By ANDY HOPSON
Assistant News Editor

In compliance with Utah statutes and a new policy set by the judges of the Provo Eighth Circuit Court, a Daily Universe reporter was given copies of some court records which previously had been denied him.

Judge E. Patrick McGuire, of the Provo Eighth Circuit Court, angrily said that though in his opinion "the whole issue was blown out of proportion" and "not fit for print," copies of court records will be made available to the public.

"We taxpayers will now subsidize you journalists so you can get copies," he said. "Frankly, I'm sick of the whole damn thing."

According to Eileen Jenkinson, a clerk at the Provo Eighth Circuit Court, she and the other clerks were instructed last week to begin selling copies of court records for a set fee of 50 cents for the first copy and 25 cents for additional copies. Attorneys will continue to receive copies for the price they have been charged in the past (10 cents per copy).

The Daily Universe had questioned a "no copy" policy which was enforced by the Provo judges prior to the formation of the new policy.

The question of whether citizens have the right to obtain copies of court

records arose when a Universe reporter requested and was denied copies of the records of a prominent Provo attorney convicted of reckless driving. However, reporters were later given copies of the records of less prominent citizens convicted of similar crimes.

McGuire attributed the inconsistent manner in which court records were released to "sloppy enforcement" of an unwritten policy which denied anyone other than an attorney the right to obtain photostat copies of court records.

The Utah Code (78-26-3) says citizens have the right to receive "on demand" and upon payment of the "legal fees" a certified copy of "any public writing which a citizen has the right to inspect."

Concerning copies which are not certified, the code (78-26-2) says citizens have a right to "take a copy of any public writing of this state except as otherwise expressly provided by statute."

McGuire had argued that the statute does not state whether the copy must be provided by the clerks or hand copied by the citizen who wants it.

John Hendrickson, Eighth Circuit Court administrator, said last week that he and the judges would try to develop a consistent policy concerning the matter, in an informal monthly meeting which was to be held Monday night.

However, the meeting was postponed because of the Columbus Day holiday. Another meeting is scheduled for next Monday.

Hendrickson said he thinks a policy similar to the one established by McGuire will be adopted by the other courts in the Eighth Circuit.

"We intend to allow copies to be given out, within reason," he said. "We'll still not give out confidential records."

He explained that in some cases, where the copy machine is not easily accessible to the clerks, citizens requesting records may be required to wait or come back later to receive them.

He said the policy must meet the approval of the other judges in the circuit before it will be adopted but he said he doesn't "foresee any opposition by any of the judges."

The other judges in the Eighth Circuit are Robert Summison of Spanish Fork, Joseph Dimick of Orem, J. Gordon Knudsen and McGuire of Provo.

Last week, a survey by the Universe of clerks in each of these courts revealed that copies were not given out in a consistent manner in any of them. However, in an interview Monday, Summison said the clerk who had spoken to a Universe reporter earlier was "mistaken."

See POLICY page 2

'An elegant building'

JSB considered pride of campus

By PAULA JEAN ROGERS
Universe Staff Writer

Today, the Joseph Smith Building may be considered somewhat dated and out of style, but it was once the pride of BYU.

"All of the principal, snazzy functions were held in the building," said Don Norton, a BYU student of the 1950s and currently an assistant professor of English. Dances, banquets, assemblies, church meetings, devotionals, lectures, concerts and plays were some of the early events held in the edifice, Norton said.

"Beautiful architecture and furnishings of the building will lend a distinctive background for the theme 'Reflections.'" The above quote does not refer to a dance location for BYU's 1980 Homecoming. It was an announcement in a 1942 "Y News" referring to the Joseph Smith Memorial Building where the Junior Promenade was to be held.

Dedicated Oct. 16, 1941 — the 66th BYU Founder's Day — the JSB was the social hub of BYU. "All facilities of the building will be opened for the occasion," continued the "Y News" article. "Dancing will be in the ballroom, wraps will be checked in the commons and refreshments will be served during the dance in the banquet hall."

Ballroom? Commons? Banquet Hall? The building has undergone some profound changes in its 39-year history.

Located in the basement, the commons has been replaced by offices. The Cougarreat, which was located in the basement, has since been moved to the more recently built Wilkinson Center.

"It was the hangout for BYU students," said Norton. "A full meal cost 60 cents, but that was too expensive for me."

See JSB page 2

The Cougarreat was once located in the basement of the JSB, where a full meal cost all of 60 cents.

American party candidate takes on political giants

By CHUCK KOFOED
Universe Staff Writer

When David slew Goliath, he showed that sometimes little guys can pack a surprisingly powerful punch, given skill and the right tools.

And in doing so he saved his fellow Israelites from destruction at the hands of the Philistines.

Likewise, members of the American Party are out to make their mark on the foreheads of such modern, intimidating Goliaths as inflation, unemployment and energy crises.

The David whom American Party members have chosen this year to tackle the giants is presidential candidate Percy L. Greaves, 74, economist, lecturer, and — among other things — former magazine editor.

However, the chances of Greaves slinging his policies at the common foes of Americans this time around seem slim.

Few people have heard of the American Party and its candidate. In Utah, considered a stronghold state for the American Party, 194 party members voted for U. S. senatorial candidate in the September primaries. Only a handful of people turned out to hear Greaves speak when he came to Provo.

Undaunted by the small turnout — "The American Party is much smaller in New York," he said — Greaves gave his audience an hour lecture on economics, in which he blamed Republicans and Democrats alike for creating the three major problems facing the United States: inflation, massive unemployment and energy.

"We've got to stop the government policies which are creating these problems and get back to the Constitution as it was interpreted by the founders who wrote it," Greaves said.

Greaves said the country needs to get back to a free market economy, from which he said it has drifted during the last 50 years.

"We have to move to free society."

Greaves, an economic consultant, outlined his views on how U.S. economic policies have affected energy, inflation and unemployment.

"The cost of gasoline has not gone up," Greaves said. "For a dime, you can get a gallon of gas in Nebraska, but it has to be a silver dime. Two silver dollars would fill up any gas tank in America."

The candidate said Republicans and Democrats have "created too many dollars" and then placed the blame on the Arabs.

"Their remedy to the energy problem has been the Department of Energy, with a \$10 million budget, and an excess profits tax," Greaves said. "The tax raises the question of how it will bring them votes, whether it will be oil subsidies for the poor in the East, or air conditioners for the Texans."

Greaves recommended a change back to completely free market influence on the energy industries, to inspire investment.

"Regulation," he said, "forced companies into the third world countries, whose governments confiscated the refineries and plants. People won't invest in America with all the regulations."

Full employment could be achieved by returning to a free market in jobs and wage rates, in which unions are powerless and the minimum wage is repealed, according to Greaves.

Union members, Greaves said, receive more than their market wage rate, which means the rate consumers would tolerate in a completely free market.

"When we give privileges to the 20 percent, we take away from the other 80 percent."

He said that unions and minimum wage laws shut people out who would work for less.

Democrats and Republicans have taken the responsibility for inflation away from themselves and have dumped it on businessmen, Greaves said, by changing the definition of inflation.

"Inflation today is not defined in the news and classroom as more money, but as higher prices," he said. "Higher prices come from inflation, they do not cause it. When you see inflation as an increase in money, then you know who is responsible — businessmen can't increase the amount of money in circulation."

Greaves said the government continues the inflation spiral by allowing large wage increases for unions and then offsetting those increases by putting more money into the system.

Although Greaves was certain about what it will take to get the United States on a sound economic footing, he said he could not tell who should make the sacrifices first.

"That should be left up to the market place," he said.

Oaks receives award for patriotic actions

Former BYU President Dallin H. Oaks was awarded the Department of the Army's award for civilian patriotism Tuesday in a small assembly of officers in Oaks's office in his support of Army ROTC.

Col. Don Andrews, chairman of the department of military science, presented Oaks with a certificate of appreciation for his service to the Department of the Army, after the citation on the award was read to the group by Capt. William Chalk.

According to Chalk, public affairs specialist for the Army ROTC unit at BYU, the prestigious

award is given to civilians for the actions which lead to an attitude of patriotism.

"During his nine years as president of BYU, President Oaks was aggressive and dynamic in his support of Army ROTC," Chalk said.

"His leadership qualities and personal interest were instrumental in generating a highly favorable on-campus attitude toward ROTC among faculty and students," Chalk added. "President Oaks took many opportunities to express and demonstrate his support for national defense, thus providing an invaluable patriotic service."

"I will cherish this award always, and I am deeply grateful for having received it," Oaks said.

The certificate, signed by Brig. Gen. Charles F. Gordon, says Oaks is the most deserving of the award for his tremendous efforts and accomplishments in support of ROTC policies and programs.

Policy

Continued from page 1

"We've never had a problem concerning copying records from our court," he said. "Sometimes the clerks ask me for permission to copy records and sometimes they do it without asking."

He said if someone really wants a copy he will give it to them. "I try to give them a copy if they need it rather than have them quote me," he said.

Summison said that though he doesn't think the issue is needed, he hasn't yet decided whether or not he would oppose one if it is proposed.

"There's some value in uniformity and I'm not one to rock the boat," he said. "However I don't see the need for a policy because

there are statutes which govern that already."

Concerning the fees charged for copies, Summison said he has tried to follow the schedule set up by the county clerks.

"I think that is about 10 cents a copy," he said. "Dimick wasn't available for comment at the time the paper went to press and Knudsen is a judge in Provo where the policy has already been adopted."

JSB

Continued from page 1

The Cougarbar was simpler then, he said, featuring hamburgers, sandwiches, milk shakes and ice cream.

The ballroom was located directly east of the auditorium and was once separated by a large double curtain, said Norton. Offices have also since replaced the ballroom. The ballroom's lobby was located where the Dean's Office is today, he added.

The banquet hall is still located in the southeast corner of the building. Although the large room has retained its original structure, banquets are no longer held there. It is mainly used for classroom purposes today.

The "club room" adjoins the banquet hall on the southwest corner of the hall. Separated by a partition, the room can still be used to enlarge the hall, or for other activities.

A serving kitchen was also connected to the banquet hall.

In addition to the building's major changes, there are other distinguishing differences today.

The JSB tower of stainless steel, cast stone and brick once contained chimneys donated by the Class of 1940. A clock was also on the tower, but there was always a problem with keeping the clock working, said Norton. The clock was eventually taken down, he said.

What is now the conference room south of the Dean's Office was

used as a study library, said Norton. The furniture was beautiful, he added.

The recently remodeled auditorium once housed both the Campus Branch and the Wymount Branch of the LDS Church. Forums and devotionals were held weekly in the building, Norton said.

The men's room had shelves where one could leave books overnight, he said. Norton said he came to BYU in 1952, the year their problems started.

"People had to be careful of the books they left on the shelves," he said. "I had an 'expensive' 36 chemistry book stolen."

When the JSB was under construction, the architect, Fred L. Markham, outlined three purposes for the structure. He said it would be used for devotional periods, housing religious education and furnishing space for social and recreational activities.

The Joseph Smith Building was a modern structure in its day. Norton referred to it as "an elegant building." While it was yet in the building process, the "Y News" again praised it highly. "It reveals a modern structure of both utility and beauty. Landscaping will provide open air social rendezvous and picturesque garden spots."

Parking

Continued from page 1

Occasional overflows of visitor parking needs could be handled by the excess of faculty parking present in the same lot, the proposal said.

"Students' park behind the Marriott Center and walk to campus through that empty parking lot and become angry," said Attorney General Kasey Haws. They have voiced dissatisfaction both to my office and to the office of the ASBYU president."

"This action is definitely a result of student input," said ASBYU President Jeff Duke. "There have been notes in suggestion boxes, letters to the editor, and students in the office."

Haws said the proposal had been received with open-mindedness, and some problems not foreseen by his office had been pointed out.

"The proposal has been moderately changed in numbers," he said.

Prenatal course begins Tuesday

A class is being offered free of charge to inform couples of options available to them in having children and to teach prenatal care. Registration began Tuesday and is limited to the first 24 couples to register at the Comprehensive Clinics on 900 East.

From A 9 Stool Root Beer Stand, We Built A Billion Dollar Corporation, Now That's Return On Investment!

And that's the story of Marriott! An undisputed leader in the worldwide hospitality industry thanks to the remarkable success of our leading hotels, restaurants, cruise ships, theme parks and contract food service operations. We're proud of our accomplishments which include a 20% compound growth rate over the past 10 years and the people who make them possible. As we implement plans for continuing this expansion throughout the 80's, fast-paced career opportunities await bright, ambitious Accounting and Finance majors in the following areas:

Hotel Controllership

Qualified candidates must demonstrate the necessary talent to develop rapidly through the ranks of our most dynamic division. Working in one of our first-class hotels or resorts will develop both your technical and managerial skills. Our goal is to develop you to the level of hotel controller within two to three years. You will have the opportunity to relocate to some of the most attractive cities in America.

Internal Audit

The Internal Audit staff engages in a wide range of financial, operational control and special audits, similar in scope and emphasis to internal consulting, resulting in major cost savings and increased productivity. College graduates are exposed to all of Marriott's businesses as they travel throughout the system as a member of an audit team. Promotion comes with experience and training to senior positions within the growing audit staff as well as to a wide variety of financial management opportunities throughout the corporation.

Corporate Accounting

As an integral member of this highly sophisticated and diversified corporate function, you'll gain a wide range of experience covering a number of businesses. In our diversified environment you operate as part of a team where you'll receive the kind of training and experience normally associated with a large accounting firm or several job changes.

To further investigate a highly rewarding career with Marriott Corporation, you can arrange a personal interview through your college placement office. We'll be interviewing on campus

Phillies storm Royals

PHILADELPHIA (AP) — Bake McBride hammered a three-run homer and Bob Boone ratted a pair of RBI doubles as the Philadelphia Phillies stormed from behind for a 7-6 victory over a battling Kansas City team Tuesday night in the 1980 World Series opener.

A crowd of 65,791, largest to watch a World Series game since 1964, kept up a steady roar as the Phillies won their first Series game in 65 years. The last one was won in 1915 when the pitcher was Hall of Famer Grover Cleveland Alexander.

Tuesday night, the winning pitcher was a 23-year-old rookie, Bob Walk, who began the season in the minors and was pressed into the opening game

assignment because of the scrambled condition of the Phillies pitching staff after the grueling National League playoff series against Houston.

Walk, recovering from a rocky start, did a gallant job against the Royals, champions of the American League, until he was shelled out in the eighth inning. He became the first rookie to pitch and win a Series opener since Joe Black did it for the Brooklyn Dodgers in 1952.

It was a night for newcomers as the expansion team Royals made their first World Series appearance, the Phillies played their first Series game since 1950, and both clubs went into the Series with rookie managers — the first

time that has happened in the history of the Fall Classic.

Early on, this looked like it would be a Kansas City night as the Royals rushed to a 4-0 lead against Walk on a pair of two-run homers by Amos Otis and Willie Aikens.

Kansas City starter Dennis Leonard, who won 20 games this season for the third time in his career, retired the first seven batters he faced on base sitting on the 4-0 lead in the third when a three-run McBride homer helped the Phillies move on top, 5-4.

The Phillies added one more in each of the next two innings to make it 7-4. While the Phillies were building their lead, Walk had settled down nicely. The young right-hander moved down nine straight batters over the middle three innings, and going into the eighth he had a string of 12 out of 13. But then he ran out of steam.

Brett, the major league's leading batter with a remarkable .390 average this season, opened the eighth with a double to the fence in left-center — his first hit of the night. Then Aikens ripped his second homer — another rocket that jumped out beyond the fence in right-center field.

It marked the 29th time in Series history that a batter had hit two homers in a World Series game and the first time since Gene Tenace in 1972 that a player making his Series debut belted two homers.

Phil Manager Green then went to the bullpen and it was no surprise when the man who popped out of the relief cart was McGraw, the 36-year-old left-hander who was all but unthinkably down the September stretch drive. McGraw had set a league championship series record by appearing in all five games.

The veteran left-hander, who has become something of a folk hero in his historic town, permitted a one-out single to Otis — his third hit of the game. But he got pinch-hitter John Wathan to slam into an inning-ending double play as he carried the lead 7-6 lead into the ninth. The fans roared louder and louder as he retired leadoff batter Frank White on a grounder to third. With the crescendo of cheers building, McGraw then struck out U.L. Washington for the second out in this battle of former also-rans. Both the Phillies and Royals had won their divisional titles in 1976, 1977 and 1978.

Hyper' spiker most improved

MARILYN HANSEN
Universe Staff Writer

Elaine Michaelis, varsity coach of the volleyball team, referred to the victorious sophomore as the most improved player on the team. Williams agrees that she has "had a hard time trying to get rid of the bad habits."

Williams started playing volleyball in the eighth grade and has played on school teams ever since. Her ultimate goal has been to play for the BYU women's team. But, according to her, it was difficult because "I didn't know how to play defense and my approach to hitting was wrong."

The red-haired spiker attributes her improvement this year to hard work

and experience. Much of the help comes from teammates and coaches, she said. She also has improved her game by watching other players perform and asking them to critique her performance.

Williams said she enjoys the team and said the members all help each other. "Sometimes some of us can see things wrong that others can't."

According to the talented hitter, there is an attitude of enjoyment among her teammates which makes the team play better during the games.

Along with her reddish-gold hair, Williams has a golden throat. She was a member of her high school madrigals for three years, was elected the president of her choir and voted in by classmates to receive the National Choral award.

Because of her vocal talent, she was once hired to sing in a quartet at a local mall in Colorado Springs for the Christmas season.

Williams also plays the violin, guitar and piano. She recently completed the lyrics and music for her first song, entitled, "Summertime love," for piano and violin.

Speaking of goals for her performance in volleyball this year, Williams said, "I want to be a smart player, and just be the best that I can be."

KTVX-TV to carry contest

For the second time this season, BYU football will be carried on a regional telecast. The Utah State game Saturday will be aired by ABC on KTVX, Channel 4.

Kickoff time has been moved to 1:30 p.m., but the telecast will start at 1:30 p.m.

The Cougar-Aggie encounter will be played in Logan, BYU will be attempting to garner its fifth victory of the year. Last season, the Aggies became victim number five, 48-24, as Marc Wilson outlasted Eric Hippie in a passing duel.

The 41-25 BYU victory over San Diego State also was carried on regional television.

The 28-3 BYU triumph over Wisconsin of the Big Ten Conference was carried locally by KBYU-TV, Channel 11.

Y golf team captures 1st in Logan Classic

The BYU golf team captured top honors in team competition at the Ev Thorpe Intercollegiate Golf Classic in Logan Monday with a 20-stroke lead over Utah State.

BYU shot a team total of 1,018 to outdistance runner-up USU's score of 1,038 and third place, Weber State's score of 1,054.

"The kids played really well, and our new kids played particularly well," said Coach Karl Tucker. J. Don Blake of USU shot a 54-hole total of 196 to capture top honors. BYU freshman Robert Meyer, who led after the first two rounds, shot a 198 and placed second.

Barry Willardson of BYU placed third, four strokes off the pace at 200.

Rick Fehr, Kent Klubha, and Dave DeSantis, all of BYU, also scored well in the tournament.

Team to go south

The BYU water polo team will be on its way to a tournament in California Nov. 6-8 because of recent wins against the Salt Lake High schools of Murray and Cypress.

The trip to California was dependent on how the team performed against three scheduled Utah teams: Murray, Cypress, and Skyline. Because of BYU's excellent performance in the two games against Murray and Cypress plans for the tournament were put into effect.

The Cougars barely slide by the Murray team, 9-8. But they drowned Cypress High, the defending state champs, 14-5.

Team members themselves were surprised by the win against Cypress. Brett Wooly, co-captain for the team, said he was surprised they beat Cypress by as much as they did. "We really played more like a team. I think Cypress was surprised too."

BYU will be playing a mixture of high school, and junior college teams at the California tournament. As of now the Cougars are scheduled to play the No. 1 junior college team in Northern California.

Jim Carter, coach for the water polo team, is arranging the tournament for the Cougars. According to Carter the tournament will give the team an opportunity to play some college teams. Carter also said the tournament should "be a lot of fun for team members."

DEADLINE FOR SUBMISSION October 24, 1980

Latin School 'resides' in old dormitory

Historic hall houses school teaching English

By ROB SWENSON
Universe Staff Writer

What once was room and board for a number of BYU students is now a school of English for foreign students and non-English speaking residents.

According to Glen Probst, director of the Latin School, Amanda Knight Hall, located just southwest of the BYU campus, is the new temporary home for students learning English as a second language.

The Latin School is a division of the department of continuing education and its main objective is teaching English to non-English speaking individuals.

When it was discovered that Amanda Knight Hall would not be used as on-campus housing this fall because of problems with the plumbing, the decision was made to use the building as the Latin School.

There are about 120 students attending classes at the school. Working with the students are Diane Farns, Diane Krause and Nancy Boyer, three teaching supervisors in charge of the teaching program used at the school.

"There are students from all over the world," said Mike James, one of the teaching assistants at the Latin School. James is a graduate student from Laie, Hawaii, and is working on a master's degree in teaching English as

Yukiko Doi, from Hiroshima, Japan, and Yukimi Nakamura, from Fukuoka, Japan, are among the students studying at the Amanda Knight Hall. The

hall is now used as a school to teach English to foreign students.

a second language. According to James, the students are of all ages from Africa, Israel, China, Japan, Central America and South America. Classes for the students go forward in the morning from 9 to 12 and con-

tinue in the afternoon from 2 to 4. Class size varies from eight to 12 students. "The small classroom setting is ideal for teaching," said James.

"A well-known problem that we as teachers face when teaching non-

English speaking students is the cultural and social differences the students have," he said. James also mentioned that usually the foreign students can read and write English better than they can understand it. He

also commented that one of the keys to teaching the foreign students is teaching them what to say and when to say it.

"It's a whole new way of teaching. Students will learn different phrases to

say, but they must also learn how to correct to say them," he said.

Lucia Ruiz, a Latin School student from San Pedro Sula, Honduras, she hopes to attend BYU next year after she finishes her classes at Latin School. "I live in Heritage with five other girls who speak English. After class I am able to home and practice all that I have learned in class," she said.

"There are students from all over the world."

Maria Elena de Yunes, one of the oldest students at the school, Puebla de Los Angeles, Mexico, is a dentist. "I used to do all the work the missionaries that were in our city. Glen Probst, the director of the school, was one of those missionaries who worked on," Mrs. Yunes said.

Carlos Calderon, from Mexico, has been a student at Latin School since the fall semester. "I enjoy my classes here, wish that we could take other classes that the university offers," he said.

It is a requirement that all students who speak English as a second language pass an entrance exam before being allowed to enter BYU.

The Latin School will remain at Amanda Knight Hall year.

Y becomes home for professional makeup artist

By KEVIN ALLAN
Assistant News Editor

He has felt at home in television, casting indians for a Kieth Merrill film, doing makeup for the Osmonds and traveling with BYU dance teams. Now Karl Wesson calls BYU home.

Wesson has led what most people would label an exciting life, having lent his talents to everything from Hawaiian Punch commercials to "Go Ye Unto All The World." So what is he doing at BYU?

"My responsibilities include promotion and public relations for the dance department. I'm currently teaching the advanced makeup course for the theater department. And I have an option to teach dance classes."

Makeup is perhaps what Wesson is best known for, though he has worked in numerous areas of the entertainment industry. He has done makeup for the Donny and Marie Show, Donna Fargo and Roy Clark specials and numerous commercials. In addition, he has contributed to nearly a dozen BYU films, including the films used in LDS temples.

His work behind the camera has brought Wesson into contact with a wide variety of performers and celebrities. Some of them, he said, have been very personable, and some have not.

"The most fun I've had has been in getting to know people. Some of the nicest people I've met are big stars, and some are janitors," he said. "If they are real people, they don't have to be glamorous."

"I don't know what it is about country/western singers," Wesson said, "but they're some of the nicest people." Donna Fargo, for instance, "doesn't try to be anything she's not," he said.

Others, however, are difficult to work with. "Buddy Hackett is a complainer," Wesson said, and "Tom Jones thinks he's the top banana in the sky."

Some are extremely talented, like Olivia Newton-John, who Wesson said is "one of the few singers with a voice good enough to actually sing live on the Donny and Marie Show." Others are not so talented. "Kris Kristofferson has to be one of the biggest idiots in the business."

And not all performers are what they seem. Leslie is a movie star, not a dog, Wesson said. He found out when she appeared on the Osmonds' show. "She gets her own first-class seat on airlines," he explained. And that's not the only thing. "She is a he," Wesson confided, "and he's the fifth one."

Not all of Wesson's subjects have been Hollywood movie stars, though. He once had the task of doing makeup for a photo session between Jimmy Carter and LDS Church President Spencer W. Kimball. The only problem came when he first approached President Carter and was grabbed by a secret service agent wary of his makeup bag.

There was the time he was doing makeup for Harold B. Lee. In the middle of the session, President Lee looked up at him and said, rather mournfully, "You know you can't make a silk purse out of a sow's ear."

Karl Wesson, left, applies make-up to actor David Ogden Stiers during production of Kieth Merrill's movie "Harry's War."

As an assistant director for "Go Ye Unto All The World," Wesson was faced with the problem of correcting President Spencer W. Kimball whenever he made mistakes. "It was a real struggle for me to tell the prophet he was not doing it right," Wesson recalled.

The past few years have seen Wesson spending more and more time as a casting director for various projects. He did the local casting for Kieth Merrill's "Harry's War" and took four trips to Montana, Colorado and Oklahoma this summer in search of American Indians for Merrill's coming "Windwalker."

His most exciting find of this summer's scouting trips took place in a McDonald's in Denver, where he spotted a young Sioux girl. Eighteen-year-old Serene Hedin had never appeared on film before "Windwalker."

"Once we got her in front of the camera," he said, "we found that not only is she beautiful, but she's also a very sensitive actress." Since that time, Wesson continued, she has received several screen offers from Hollywood production companies.

It was while he was "in the middle of production for Windwalker," that Wesson was approached about employment at BYU. The decision to return to the campus was a family decision, he said.

He had worked at the motion picture studio while doing work on his master's degree several

years ago. Numerous offers of work in motion pictures came to him during that time, and the decision was made to "pursue the possibilities."

"In the midst of all these projects, though," he said, "I found myself spending more time away from home and my family than at home. It was then that he and his wife decided, 'as glamorous and exciting as the work had been, maybe it wasn't what we wanted.' So when there was a position opened in the newly organized dance department, he accepted it."

Though he still intends to "keep in touch with the industry," Wesson now spends his time "making dance programs and tours flow more easily," and improving communication between the dance department and all its audiences.

And he, along with the other faculty members who work in the department, holds hopes for the future.

"We have dreams and aspirations of a dance theater. We're trying to develop the department," he said. BYU has received considerable praise for its dance teams, he said, "and there's no reason some of the nation's best dancers shouldn't be interested in BYU."

"We probably have the widest realm of dance of any department in the nation, or in the world," he continued. "We've proven on the road that our dancers stack up against the best in the world."

Official weather station installed by Y in Provo

By TOM MURDOCK
Universe Staff Writer

With the installation of new weather devices at campus Sept. 9, BYU is an official United States weather station.

The project was the idea of Dr. Dale J. Stevens, an assistant professor in the geography department. "With a grant from the College of Family and Social Sciences and the help of the physical plant, the weather station became a reality," Stevens said. "The college had an unrestricted research fund available and I applied for it."

The \$7,000 project was constructed by the physical plant, which donated about \$2,000 to the project, Stevens said. At present the station is equipped with temperature and precipitation measuring devices but will eventually have equipment to measure wind, humidity, evaporation, soil and water temperature, he added.

The data collected daily will be sent once a week to the U.S. Weather Service in Salt Lake City and State Climatologist Arlo Richardson in Logan. The data is sent monthly to the National Climatic Center in Asheville, N.C., Stevens said.

Professor says women should set priorities

By AUDREY GASKING
Universe Staff Writer

It is possible for young women to complete their educations while married by reassigning their priorities, said Dr. Brent A. Barlow in a lecture to the women of BYU.

Barlow, associate professor of family relations at BYU, lecturing on the issue of combining education and marriage, said women are facing important issues today.

"We are at BYU to obtain an education," he said, "yet marriage is an integral part of the system as well. We must confront the issue of whether both are obtainable and if both are desirable."

Barlow discussed the problem and solution in five parts.

The lecturer began by describing the situation at BYU. Students at BYU are seeking knowledge and partners, he said. "The goal of a couple might be to pursue an education, find a husband and graduate," he said.

Next, Barlow spoke of the pledge of BYU and the LDS Church.

"We are committed to the education of women as well as the education of men," he said. "With the number of single, divorced and separated women in the world, there is no distinction between a man's and a woman's need for education."

Quoting former President Dallin H. Oaks, he said, "We encourage young women to make effective life plans."

Education is more than vocational training, Barlow said. "Seek education for education's sake. A mother's vital teaching responsibility makes education necessary."

Barlow quoted statistics emphasizing the need for education among women. "One out of three adult women do not have husbands supporting them," he said. "Six out of 10 families have both husband and wife working. These trends are carrying into the church. The main cause is economic necessity."

The conflicts which can occur between education and marriage were next discussed.

"A woman is encouraged to get an

education, get married, be supported by her husband, have a family and be debt," Barlow said. "Can be done?"

The answer is yes, Barlow said, proposed a solution. "Statistics show that the farther a woman's education, the better the chance that she will graduate," he said. "She would like to see a new cultural phenomenon take place at BYU where women propose that women seriously consider marriage until they have reached the age of 21."

This solution would solve problems at BYU also, Barlow said, such as dating desecration and pregnancy.

"It also supports church recommendations against marriage," he said.

Barlow closed with his test that both goals are obtainable. "The Lord gives no command that we cannot keep," he said. "We have to have faith."

Mutt returns to Ju Sir Isaac Newton found by ad for

Monday night was a night that both goals are obtainable. "The Lord gives no command that we cannot keep," he said. "We have to have faith."

The Hollands were celebrating the return of their dog, Sir Isaac Newton, following his four-day disappearance.

Sir Isaac Newton was found by Kathy Heller, who took him to her home. "I saw him in the Daily Universe, Mrs. Holland said. "Connie Rowley saw the ad we had lost our dog and contacted with the information," she said. "She contacted Miss Heller, who found the dog around 8 p.m. Monday."

"We are absolutely delighted," Holland said. "The children see him (Sir Isaac) alternately all the time."

Sir Isaac Newton has been with Hollands for eight months.

Sexual dimorphism, seasonal changes

Museum to feature animals' color changes

By CARLA A. SCHIEVE
Universe Staff Writer

New displays in the Monte L. Bean Life Science Museum will illustrate seasonal color changes and sexual dimorphism of animals, Elbert Simmons said.

Simmons, who is educational adviser to the museum, said he is conducting this museum experience to help students understand coloration differences and changes in animals.

Changes in actual coloration of an animal usually occur because of a particular enzyme action, said Duane Jeffery, associate professor of zoology. As an example, he cited the Siamese cat, whose lifetime coloration depends on an enzyme which is heat sensitive. When the cell temperature is too hot, there is no pigmentation in the fur; when the cell temperature is lower, the fur becomes darker. This is why a Siamese is usually darker on the tips of his nose, paws, and tail.

Examples of seasonal coloration changes in animals, Simmons said, are the snowshoe hare which

is gray, brown, and white-flecked during the summer and by October has become predominantly white with just a streak of brown down his back; the ptarmigan bird which is flecked with gold, white, brown, and black in the summer and is completely white in the winter; and a starling whose white spots on his black body disappear during the winter.

Jeffery said color changes can also be brought about by environmental factors, such as day length and temperature, and mutations in the animal's genes. Mutations occur in approximately one in every 100,000 animals, he said, and are a change in the coding of the animal's DNA. Just one change in the long series of DNA code affects an animal's reproductive outcome.

How much time passes before a species is affected by this one in 100,000 mutation is related to how many generations an animal reproduces in a year. Whereas insects may produce as many as 15 to 20 generations a year with thousands of offspring, a rab-

bit will produce only two generations a year with three to 12 offspring each time.

Through this museum experience, students will also come to understand sexual dimorphism, Simmons said. Sexual dimorphism refers to the differences in colors between the male and female of a species.

Examples of dimorphism, Simmons said, include the male flickers with red patches on his breast and the plain gray female; the more brilliantly green, blue, and gray colored male mallard duck, in contrast with the predominantly subdued brown coloration of the female; and the multicolored red, gold, orange, yellow, and brown male pheasant, compared with the muddy brown, white-flecked female.

Seasonal coloration and sexual dimorphism, Simmons explained, affects an animal's lifestyle, making him apparent to or concealing him from predators. Animals living in adverse environments who cannot change either physiologically or colorwise are selected out and die off, Simmons said.

AP-NBC Poll

Religious bloc split

Four Americans, Briton set Nobel science prizes

STOCKHOLM, Sweden (AP) — 1980 Nobel prizes in physics and chemistry were awarded Tuesday to four Americans and a Briton for discoveries that may shed light on the origin of the dim past and could open the way to medical cures of tomorrow.

Mugabe invites Soviet Union to set up shop

HBURY, Zimbabwe (AP) — Minister Robert Mugabe said his six-year-old government has invited the Soviet Union to set up an embassy in Harare, the capital.

Mugabe said the invitation was up to the Soviet Union to decide whether to open an embassy in Harare.

Iranian planes bomb Baghdad; Iraqi troops threaten oil city

BEIRUT, Lebanon (AP) — Iran's American-made jets on Tuesday bombed Baghdad for the first time in more than a week. Iraqi ground units were also reported to have moved into an effort to put the Iranian oil-refining city of Abadan under siege.

Iran claimed to have put down a Kurdish insurrection during two days of fighting along the Turkey frontier. And the Iranian Parliament reported to have asked other Islamic and non-Islamic nations to put pressure on Iraq to end the fighting as new mediation efforts got under way.

correspondent Steve K. Hindy reported that the pontoon bridge that the Iraqis installed in the Karun River last week between the Karun River and Abadan that the invaders applied to have mounted a siege of both cities.

Iran reported seeing four large fires burning on the side of the river. He quoted the Iraqi commander in the area as saying his sappers exploded the dam-Duzful-Ahaz-Tehran pipeline at those points. The pipeline normally carries refined products to Tehran.

Hindy said the Iraqis were clearly masters of the Karun-Ahaz highway and railway on the western side of the river and the Abadan-Ahaz highway on the eastern side. He said he personnel carriers moving Iraqi troops toward front.

An Iraqi military commander said 12 civilians were wounded in the air attack on Baghdad. A photographer in the Iraqi capital said a heavy rain of what looked like oil smoke could be seen in the section where oil installations are located.

An Iraqi military command said its forces in the northern end of the 300-mile battlefield spread in three directions from positions north of the strait port city of Khorramshahr.

The Iraqi tank force drove southward in the direction of the Persian Gulf in an apparent attempt to surround Abadan and complete its takeover of the vital shipping lanes of the Shatt al-Arab waterway.

Shatt al-Arab is Iraq's only route to the gulf until the start of the war 23 days ago was the border between the two nations. Abadan is Iran's

American dominance of the Nobel science prizes. The British chemist laureate, Frederick Sanger, is only the second person to be awarded a Nobel Prize twice in the same category.

Sharing the chemistry prize with Sanger were Paul Berg of Stanford University, who is regarded as the "father of genetic engineering," and Walter Gilbert of Harvard University.

The three researchers were honored for their discoveries in the chemical structure of genetic material, the master blueprints for life, findings that could help develop cures for inherited diseases.

Berg will receive half the \$212,000 prize, and Gilbert and Sanger will share the other half.

The physics prize was shared by James Cronin of the University of Chicago and Val L. Fitch of Princeton. They headed a team which found an aberration in natural laws that some scientists believe could reinforce the disputed big-bang theory of the origin of the universe.

Seven of the nine 1980 Nobel prizes so far have gone to Americans.

The medicine prize was shared by Baruj Benacerraf of Harvard, George D. Snell of the Jackson Laboratory in Bar Harbor, Maine, and Jean Dausset of France. The literature prize went to poet-novelist Czeslaw Milosz, a naturalized U.S. citizen who writes in Polish. The peace prize was awarded to Argentine rights activist Adolfo Perez Esquivel.

The winner of the economics prize will be announced Wednesday.

All except the economics prize were

established at the turn of the century by the will of the inventor of dynamite, Alfred Nobel. The economics prize was set up by the Central Bank of Sweden in 1968.

Before Sanger, the only person to have won a Nobel in the same field twice was American James Bardeen, the physics winner in 1956 and 1972. Marie Curie of France won the physics and chemistry prizes in the early 1900s, and American Linus Pauling won the chemistry prize in 1954 and the peace prize in 1962.

The three chemistry laureates were cited for a field of research, genetics, that has produced 20 Nobel Prize winners in 21 years.

They worked on deoxyribonucleic acid, or DNA, the spiral molecular compound in the nucleus of a living cell that governs heredity, affecting such functions as reproduction ability and growth.

Berg, 54, was the first researcher to construct a recombinant DNA molecule, one containing DNA from different species. His work led to the technology often called genetic engineering or gene manipulation, clouded by controversy because of some scientists' fears that it could create new, unknown and dangerous organisms.

Because of the controversy, Berg himself recommended and adhered to a moratorium on the research in 1974.

Gilbert, 48, and Sanger, 62, independently developed methods of determining the sequence of nucleotides, the building blocks of DNA.

\$500 per day fine imposed on reporter for contempt of court

BOISE, Idaho (AP) — Idaho State court reporter Ellen Marks was ordered Tuesday to pay \$500 a day for refusing to disclose details about an interview she conducted with a woman wanted in a child custody case.

About six hours later, Miss Marks' attorneys asked the Idaho Supreme Court to stay the fine pending the high court's review of the contempt of court ruling against Miss Marks.

"The size of the fine is onerous — \$500 per day is a very high monetary sanction," attorney Robert Bilow said after he filed the stay request.

Magistrate Judge Karen Vehlou originally jailed Miss Marks on Sept. 19. She was in jail 1 1/2 hours until her attorneys filed an appeal.

On Oct. 7, Mrs. Vehlou ordered Miss Marks to pay \$500 each time she appeared in court and refused to testify about the interview.

Tuesday, Mrs. Vehlou said the fine would be \$500 each day Mrs. Marks failed to purge herself of the contempt.

Miss Marks told Mrs. Vehlou that she would not change her position.

Bilow argued in court that Mrs. Vehlou didn't have jurisdiction to impose a fine with the contempt order is an appeal to the state Supreme Court. Bilow cited a previous state Supreme Court ruling that said judges should proceed with caution before ordering reporters to reveal confidential sources.

"I have considered this matter as deeply and cautiously as I can," Mrs. Vehlou said. "My order stands."

Mrs. Vehlou said that if Bilow objected to changing the contempt order while it is on appeal, she could change the citation back and jail Miss Marks again.

Miss Marks, 24, conducted an interview in early September with Geni Gilmore, who disappeared Sept. 5 with her 8-year-old daughter. The child's father, Michael Cleary of Omaha, Neb., had been awarded custody of the daughter when he and Mrs. Gilmore were divorced in 1975.

Mrs. Vehlou has been trying to find the mother and daughter. The interview between Miss Marks and Mrs. Gilmore was arranged by a friend of Mrs. Gilmore. Miss Marks testified Sept. 19 that she pledged confidentiality to several persons involved in the case.

Miss Marks said it would violate her First Amendment free press rights and her journalistic ethics to reveal confidential information.

The Statesman, a Gannett newspaper, has agreed to pay Miss Marks' legal fees and fines.

NEW YORK (AP) — The well-publicized efforts by some conservative Christian groups to mold the "born-again" faithful into a voting bloc for this fall's elections don't seem to be working, an Associated Press-NBC News poll says.

Born-again Protestants are now splitting their votes between Jimmy Carter and Ronald Reagan in the presidential contest, despite endorsements of Reagan by some leaders of the conservative Christian movement. In fact, Reagan does more poorly among the born-again voters than among others.

And the final pre-election push planned by conservative Christian groups probably won't find a receptive audience either.

Basically, born-again Protestants and likely voters generally don't think churches and clergymen should get involved in politics. And only about one born-again Protestant in 25 said he would be more likely to vote for a candidate backed by a member of the clergy. Nearly nine in 10 said such a suggestion by a minister would make no difference.

One of the major features of the elections this year has been the increased activity of conservative Christian groups, with names like the Moral Majority and the Christian Voice. The leaders of these groups proclaim that "born-again" Americans are a major, untapped force in this country's politics.

The latest AP-NBC News poll, taken Oct. 8-10, included a series of questions to probe attitudes toward involvement of churches and religious leaders in politics. The results suggest efforts to use religious leaders to mobilize political action run headlong into deeply held beliefs about the separation of church and state.

About one-third of the 1,548 likely voters interviewed classified themselves as "born-again."

That group split on the presidential race, with Reagan the choice of 42 percent and Carter named by 41 percent. Independent candidate John B. Anderson was the choice of 6 percent, others were named by 1 percent and 10 percent were not sure.

Both Carter and Anderson have described themselves as born-again Christians.

That's not a particularly good showing for Reagan. Among non-born-again Protestants he leads Carter by a 51-27 edge, while holding a 43-35 margin among all likely voters.

And that also indicates progress in the past two weeks for Carter. In the AP-NBC News poll taken Sept. 22-24, Reagan was the choice of 46 percent of the born-again group and Carter the choice of 35 percent.

One fact often overlooked in discussions of born-again

Protestants is that many of them are black. Fifty-three percent of the blacks said they are born-again versus 34 percent of the whites.

The born-again black voters are the major reason for the even split in the presidential preference.

Black born-again favor Carter by an 82-6 margin, while white born-again back Reagan by 46-37. But that showing by Reagan among white born-again Protestants is poorer than he does among non-born-again Protestants.

The poll said that born-again Protestants are not receptive to political involvement by religious leaders.

By a 61-35 margin, born-again Protestants said that churches and clergymen should not get involved in politics, like endorsing candidates. That is similar to the 66-30 finding on the same question for all likely voters.

Asked specifically their response if asked to back a candidate by a member of the clergy, only 4 percent said they would be more likely to vote for the candidate. Seven percent said they would be less likely to vote for him and 87 percent said the clergyman's recommendation would make no difference.

Among all likely voters, the split was similar: 3 percent said they would be more likely; 8 percent less likely and 88 percent no difference.

Not many people said they have already been asked to support a candidate by a member of the clergy.

Only 3 percent of the born-again group and an identical percentage of all likely voters said they had already been approached by a minister and asked to vote for a candidate.

In each case, the remainder were undecided.

As with every sample survey, the results of the AP-NBC News polls can vary from the opinions of all likely voters because of chance variation in the sample.

For a poll based on about 1,500 interviews, the results are subject to an error margin of 3 percentage points either way because of such chance variations. That is, if one could have talked to all likely voters with telephones last week, there is only one chance in 20 that the findings would vary from the results of polls such as this one by more than 3 percentage points.

For figures based on born-again likely voters, 520 of whom were interviewed, the error margin is 6 percentage points.

Of course, the results could vary from other polls for a number of additional reasons. Differences in the exact wording of questions, differences in when the interviews were conducted and different methods of interviewing could also cause variations.

Leaders calm 'frustration'

ATLANTA (AP) — Civic leaders rallied Tuesday in an effort to calm what the mayor called "a feeling of frustration and isolation" among low-income blacks that was aroused by the murders of eight black children and heightened by a deadly furnace explosion.

Even as the rubble of the Gate City Day Care Center, located in a low-income housing project in a predominantly black neighborhood, was being cleared, a number of rumors brought top city officials to the scene to try to calm the fears of residents.

Four black pre-school children and one adult were killed in the explosion Monday.

Already dealing with public outcry about the unsolved murders of eight black children and the disappearance of six others, officials now are faced with growing frustration among blacks who have expressed fear that the incidents somehow are connected.

In a news conference Tuesday, Mayor Martin Luther Jackson, who is black, said, "Even when there is zero evidence of any foul play, there is such a feeling of the broader community not getting a great frustration, a feeling of isolation."

The mayor added that he has heard people say "thousands of times" that "if those were white children, every resource in America" would have been used to investigate the incidents.

The bodies of the eight children have been found in various areas of the city. None has been found in the immediate area of the explosion.

To stem fears raised by the explosion, Jackson and Public Safety Commissioner Lee Brown, who is black, said the city's police hierarchy also is black, mingled in an angry crowd Monday, assuring residents that the explosion

High court approves airing Abscam tapes

NEW YORK (AP) — The U.S. Supreme Court cleared the way Tuesday for television broadcast of audio and videotapes played in the first Abscam trial, including one that shows Rep. Michael Myers, D-Pa., accepting a \$50,000 payoff.

Copies of the tapes were released to NBC, the pool coordinator, on Tuesday afternoon and were expected to be available for broadcast, in part, on evening news programs.

The tapes were released after the high court refused to overturn a ruling first made by U.S. District Judge George E. Pratt during the August trial. Although the issue was raised only in the Myers trial, the decision is expected to result in the future release of tapes used in the other Abscam trials.

The networks and other major television and radio organizations were receiving three and one-half hours of material — all of the tapes introduced in the trial that ended in the bribery-conspiracy convictions of Myers, codefendant Angelo Errichetti and two others.

On the tapes, Myers and Errichetti are heard discussing their influence over scores of politicians, members of the Mafia, members of the Philadelphia City Council, dock

was an accident caused by a faulty furnace.

"There is nothing at all to indicate that the explosion was the result of foul play," Brown told the group.

But the statements have drawn skepticism from many area residents.

"I don't know what happened," said Charles Davis, a resident of the housing project. "But even if it happened like they say it did, the people don't believe it."

Davis' concerns were echoed by many attending a parents' meeting Monday night, and by many others who called a rumor control number set up by Jackson at the city's Civil Defense headquarters.

Monday's explosion came on the heels of last week's discovery of the body of 12-year-old Charles Stephens, the eighth black child found dead in the metropolitan area in 14 months.

Police have created a special task force to work solely on these cases.

Concerned parents have formed groups, such as the Committee to Stop Children's Murders, to give children safety tips and to meet with police.

workers' unions, port officials and coal mining interests.

One videotape records an Aug. 22, 1979, payoff meeting between Myers, a former longshoreman; FBI agent Anthony Amoroso, posing as the sheik's bagman; Errichetti, a New Jersey state senator and mayor of Camden, N.J.; and Mel Weinberg, the convicted con man who helped devise an FBI sting operation that resulted in the indictment of six congressmen.

In return for the money, Myers agreed to help the supposed sheik with immigration matters, a violation of federal law.

At meeting's end, Amoroso gave Myers a manila envelope containing \$50,000 and told him: "Spend it well."

"It's a pleasure," Myers said.

On another tape, Myers tells undercover agents he can influence five other Philadelphia area congressmen, some Ohio congressmen and members of the Ways and Means, Appropriations, Budget and Judiciary committees of the House.

Also among the released tapes is a 100-minute videotape of a Jan. 24, 1980, meeting between Myers and undercover FBI agents in Philadelphia, where Myers complained that his cohorts had split up a \$50,000 in such a way that he netted only \$15,000.

Owner offers reward for lost dog

A substantial cash reward is being offered for the return of a lost puppy. Jones lost his half Australian Shepherd, half Labrador Retriever Oct. 6 at Joa-

quin Elementary School. The pup is four months old and answers to the name of "Yoda."

Anyone having any information concerning the puppy is asked to call Jones at 375-1438.

Psychologist to speak

The Honors Program will be sponsoring an evening with Dr. Harold L. Miller Jr., Thursday at 7 p.m. in 455 MARB.

Miller, associate professor of psychology and directorate member of the Honors Program, has entitled his lecture, "Minds Turned on Mind: Findings and Philosophizing." All BYU faculty and students are welcome to attend.

"As a general rule, these evening lectures are especially for students in the Honors Program, but we extend an open invitation to any student interested in listening to Dr. Miller," Leroy Gunnell, Honors Program administrative assistant, said.

"This particular lecture," Miller said, "is taken from a sampling of re-

Fewer highway deaths reported, Utah drivers' safety improved

Deaths on Utah highways totaled 19 less than at this time last year, according to the commissioner of public safety.

Commissioner Larry E. Lunn said this figure shows real improvement in driver safety because the population and traffic flow increased over the past year.

Lunn said although the rate has decreased, 237 people have already died this year and another 75 to 80 people will die in highway accidents by New Year's Day 1981.

Thirty-five deaths occurred in July, the highest rate for any month so far in 1980, the Utah Highway Safety Office reported. Office statistics show that July 1979, with 58 fatalities, had the highest number of deaths in a month since 1972.

Lunn warned that Utah drivers cannot be complacent as winter and increased-driving holidays approach. He said drivers need to realize that in most crashes, a traffic law has been violated.

Politics kill program says former justice

SALT LAKE CITY (AP) — A former chief justice of the Utah Supreme Court says politics caused the court to kill a program that would have kept its caseload from becoming too large.

A.H. Ellett, who retired from the high court Dec. 31, 1978, said the program was killed because the present justices favor an appeals court system in Utah, and reducing the caseload would undermine their arguments in favor of the appellate court.

After Ellett's retirement, he was asked to spearhead a settlement program to keep as many cases as possible from going before the high court. Lawyers met in conference and tried to resolve their differences out of court.

Ellett said at least 42 cases were settled that way. He says the lawyers involved were nearly unanimous in feeling the program was beneficial even if their cases ultimately went on to a full review by the Supreme Court.

"I am of the opinion that the vote was not any criticism of the program. Rather, it was an expression of the feeling of those members of the court who were offended at my failure to endorse their efforts to secure an intermediate court of appeals to do the work which they claimed was too much for them to do," Ellett said.

Justice Richard J. Maughan, who will become chief justice in January when Justice J. Allan Crockett retires, has been advocating an intermediate court of appeals for some time.

Justices D. Frank Wilkins and I. Daniel Stewart also favor the intermediate court.

Ellett says adding two or more justices to the Supreme Court would reduce the workload and be far less costly.

"The new court would have the same caseload as the Supreme Court now has and it would result in two costly appeals instead of one," Ellett said. "That court as now constituted can readily do the work," he added.

The Constitutional Revision Commission and Gov. Scott Matheson favor an appellate system.

Matheson says adding justices to the bench would be a "Band-Aid approach" to the problem.

Maughan says the Supreme Court's caseload has increased 300 percent in recent years.

Second phase construction begins on physical plant

Phase one of an office area remodeling project in the Brewster Physical Plant Building has been completed, said Warren Jones, BYU architect.

Jones, who designed the new facilities, said the second phase is now under construction. The project is being undertaken by the BYU physical plant shop crew, said Jones.

Because work is being done only when the crew is not needed elsewhere on campus, there is no set date for completion, he said. "Work has been going on for about a year," said Jones.

The project is being undertaken to relieve crowded conditions in the physical plant building, said Kirk Jolley, architectural draftsman for BYU.

"The space we have will now be used more effectively," said Jolley.

Pranks fether firemen

Some BYU students are guilty of making prank fire calls, according to a member of the Provo Fire Department.

If prank calls are suspected, a holding device is placed on the phone lines to trace calls that come in, explained a department dispatcher.

Paul Paxton, emergency medical technician, said the department gets an average of three prank calls a day, which cause quite a problem with men and units being tied up in case of real emergencies.

"We get some calls from BYU students playing jokes on their friends," Paxton said. The students are not the source of most of the calls, though.

Fire Inspector Carl Lovelless said young children, teenagers and retarded children make most of the phony calls.

"There was this one retarded daughter of a BYU professor we had a real problem with," Paxton said. "She must have called us at least 24 times."

Paxton said the department learned to recognize her voice but it had to respond to the calls in case there was a problem. "There never was anything wrong," he said.

Lovelless said there are three emergency lines to the department and each line is hooked up to a recorder. He said every call is recorded and firemen try to determine the identities of the prank callers.

Whether action is taken against the pranksters is up to the fire chief and the city attorney, but the offenders are urged not to make the calls and are told of the consequences, he said.

"If men and equipment are out on phony fires and a real emergency comes in, it may take longer for a unit to be dispatched," Lovelless said. "Those few extra moments can make a real difference in fire fighting."

"Some people get their kicks out of the noise of the sirens and the flashing lights," Paxton said. "People call in fake fires just to get the units out on the road."

Lovelless said even when a call is suspected of being a fake, units are dispatched if the caller says there is an emergency and gives an address. "Sometimes the address given does not exist," he added.

Paxton said prank call situations are very upsetting to the fire department and causes a loss of money and manpower.

BRIGHAM YOUNG UNIVERSITY Developing a Healthy Self-Image

How do you feel about yourself? Many of our actions and values are based on the feelings we have about our self worth. In no other area is a positive opinion so important.

Negative self-concept is a major human problem which results in enormous personal and economic costs.

Learn practical guides for the enhancement of self-concept in this new course which has become one of the most popular offerings of the BYU Division of Continuing Education.

"This course is vital to all people; it should be taught to every student at BYU. It should be a daytime class!"

"I loved this course. I would like to spend a couple more weeks in it. It should be a requirement for everyone."

The basic course concepts are scripturally based, having been distilled from the standard works and the teachings of the past and present presidents of the Church of Jesus Christ of Latter-day Saints.

The following topics will be discussed:

- The fundamental characteristics possessed by the inner spirit of each individual.
- The origin and development of the substitute self that emerges as a defense against the negative experiences of life.
- How the real self can deal with the substitute self.

Date and Time: October 30 - December 11, 1980
Thursday evenings, 7 - 9 p.m.

Instructors: Dr. James D. MacArthur and Roger D. Copen, Career Education Department
Brigham Young University.

Course Fee: \$50.00 Psych 495R 1 credit
\$35.00 noncredit

For further information contact: Conferences and Workshops, 242 Herald R. Clark Bldg., telephone 378-4785.

PEANUTS® by Charles M. Schulz

At-A-Glance

The deadline for at-glance items is noon the day before publication. There will be no exceptions. Items should be sent to 538 ELWC.

Honors Program sponsors speaker Dr. Harold L. Miller of the psychology department will speak on "Minds Turned on Mind: Findings and Philosophizing," Thursday at 7 p.m. in 455 MARB. Miller is a member of the Honors Program doctorate.

Health Science majors Laurita Evans,

registered nurse and licensed midwife, will speak on midwifery Thursday at 10 a.m. in 235 RB. All interested persons are invited.

Washington Seminar spring/summer internships The application deadline for internships is Friday. In addition to the spring/summer program, there are still a few openings for the winter program, which starts in January. Applications and information for all programs are available in the department of government, 320 KMH, or interested persons

can contact Ms. Laura J. Wilson at ext. 6029.

Architect and author to speak Ron Molen, a Salt Lake City architect and author, will be addressing design students and faculty on "New Trends in Residential Design," Thursday at 10 a.m. in 205 HRCB. Everyone is invited.

Workshop for research proposal writing The Research Division is sponsoring a workshop on "Developing Research Programs" Wednesday from 9 to 10:30 a.m. in 110 ELWC. Workshops are open to faculty, administrators and students. For more information, or to confirm attendance, contact Debbie at ext. 3841.

Canadian Government Foreign Service Examination Canadian students interested in taking the Canadian Government Foreign Service Examination should contact Earl Fry, coordinator of Canadian Studies, at 132 FOB, or call ext. 3010. The examination will be offered Saturday.

Mexican-American Students to meet There will be an organizational

meeting Wednesday at 5:15 p.m. in 375-77 ELWC. All Mexican-Americans are invited to attend.

Utah County Epilepsy Association to meet The monthly meeting will be held Thursday at 8 p.m. in 349 ELWC. For further information about the Utah County meeting or organization, call Mrs. Campbell at 375-8244.

Executive Lecture Series Edward W. Estlow, president of the company which owns Scripps-Howard Newspapers, will lecture on "Changes Coming in the Communications Business in the Next Ten Years" today at 4 p.m. in 184 JKB. The public is invited, and there is no admission charge.

Men-How to dress for success The first session of a three-session mini-course designed to help men create a new image and improve self-confidence will be held today from 7:30 to 9 p.m. in 349, 351 and 353 ELWC. Tuition is \$25 and enrollment is limited to 30 people. For more information, contact Conferences and Workshops at ext. 3556.

Unique class in political games A course in political simulations or games is being offered second block for all interested students. Enrollment will be limited to the first 40 students to sign up at the department of government, 320 KMH. The course will generally run from 3 to 7 p.m. Thursdays. For more information, contact the department at ext. 3422.

Deadline for interns with Utah Legislature Tuesday is the deadline for applications for internships with the Utah State Legislature. A training session will be conducted Tuesday and Thursday at noon during second block of fall semester for one hour credit. Applications and further information are available in 320 KMH.

Wilderness Survival Trek The recreation-youth leadership department is sponsoring a different kind of outdoor experience that instructors say will be physically, emotionally, spiritually and socially involving. The

Wilderness Survival Trek will be held once again, Oct. 30 through Nov. 3. For more information, contact Doug Nelson at ext. 4642.

English professor to speak Dr. Karen Lynn, associate professor of English at BYU, will discuss "Leisure Time: Friend or Enemy in Mormon Society?" today at 8 p.m. in the Wilmer W. Tanner Auditorium of the Monte L. Bean Life Science Museum. Cost of the lecture is \$1 for students and \$1.50 for the general public.

BYU physics professor to speak Dr. Max Hill, professor of physics and astronomy department, will speak at a physics seminar on "PIXE Research" today at 4 p.m. in 260 SC. For further information, contact the physics and astronomy department at ext. 4361.

Multivision spectacular Kodak and the BYU Bookstore are sponsoring a multivision spectacular Thursday, at 8 p.m. in the main ballroom of the Wilkinson Center.

International students invited to workshop All international students are invited to attend an employment workshop, sponsored by the International Student Association, today and Thursday. Resumes, letters, interviewing and choosing an employer will be discussed by Lynn E. Johnson, associate professor of career education, and Enoc Q. Flores, international student adviser at BYU, today, from 4 to 5 p.m. in 240 BRMB. Flores and Jay Irvine, placement center assistant at BYU, will present the second session Thursday, from 10 to 11 a.m. in 240 BRMB. The subject will be the "Placement Center."

Retreat to deal with family finances Seminars dealing with family finances will be the theme at a weekend retreat sponsored by the department of family resource management.

The FRM department will be going to Timb Lodge on Saturday to participate with other students in the FRM program for seminars dealing with setting up

family organization corporations for tax purposes, ethics on family planning finance, financial counseling and consumer credit and counseling.

FRM deals mainly on financial planning in the home and for better family management within the home. The program allows the knowledge learned for the home to go outside the home and counsel others in family finances and home management.

The FRM retreat will deal with these concepts and further the knowledge of others who are interested in the program, said department Chairman Connie Roberts.

Besides the seminars, social activities will be featured, including a dance at the end of the day.

The retreat will begin at 4 p.m. and the seminars lasting until 6 p.m., and activities concluding at 11 p.m.

ROTC lecture to be held In the second of a series of monthly lectures offered by the department of military science at BYU, Dr. F. Lamond Tullis will be examining the turmoil in Latin America. The lecture will be held today in 445 MARB at 7:30 p.m.

Tullis, the chairman of the department of government, has done extensive research in Mexico, Guatemala, Brazil, Uruguay, Argentina, Chile, Paraguay and Bolivia. In addition, he has lived in many South American countries.

The public, especially the students, are invited to attend this free lecture, according to Capt. William Chalk, public affairs specialist for the Army ROTC unit at BYU.

Y students engaged after marathon finish

Some people will do almost anything to get engaged, especially at BYU. One student ran after his girl for more than three hours, covering 26 miles before he finally convinced her to marry him.

Paul Stout, a freshman majoring in journalism from Orem, handed his fiancée-to-be a diamond ring as he stumbled across the finish line of the St. George Marathon Oct. 4. He placed about 500th in the race.

Teryl Kresge, Stout's fiancée and a BYU graduate in Youth Leadership from Orem, was waiting for him at the finish line and was more than surprised when she was handed the baton, with a ring in it, which Stout had carried through the entire race.

"She didn't know what to think," Stout said. "She knew it was coming, but she didn't expect it to happen then."

Stout said he had been planning this for some time and wanted to ask Miss Kresge in an "extra special way."

"I've been planning this for a year and a half," he said.

The marathon was sponsored by St. George Parks and Recreation and had more than 1,000 participants. Approximately 90 percent of the runners finished the race, Stout said.

The freshman said he trained six months for the race and didn't miss a day of running since he began in April.

"I told her (Miss Kresge) to be sure and be at the finish line," Stout said. "She was there and she was ecstatic."
